

# 3E FOLDING STOCK

**The folding stock makes your AR180B or your WK180c easy to store with a sleek, modern stock.**

**The folding stock is made out of a high strength polymer that keeps the comb in line with the bore ensuring that felt recoils is straight to the rear, for rapid follow up shots, while allowing a good check weld that keeps your eyes lined up with the standard assortment of optics and sights that are common for these rifles.**

**Unlike a metal stock, these will not steal the heat out of your face during a cold Canadian winter.**

**The stock folds to the right side of the gun leaving left side charging handles unobstructed. With the left hand charging handle, the rifle can be fired with the stock folded.**

**The stock is fitted to the firearm receiver with a sturdy 7075 Aluminum mounting block. The strength of steel at a third of the weight.**

**Don't settle for awkwardly low comb heights or cold, unadjustable folding stocks from the 1970s, you deserve better.**

**The AR180b and WK180c both have different geometry on the back end. Please be certain of the model you have before ordering. We can not confirm or deny the fitting of this stock system to any other platform.**
